Rachael Kortt [REDACTED]

Lake Macquarie

Hi There

Please please please change the policy for our kids!

Seeing your son have multiple asthma attacks on a number of weeks is frightening.

Our windows have a thick layer of black dirt, I always wondered where that came from and now truly believe it is from the power stations directly opposite us on the lake.

Our outdoor furniture is covered.

Walk outside on the deck and your feet are black.

This can't be normal it's really concerning.

I thought we made the right decision by moving to this beautiful place but am seriously reconsidering our decision after learning the serious health impacts and what it could be doing to my children.

Kind regards

Rachael
