[BULK] Take the Survey Form Submission

There has been a submission of the form Take the Survey through your NSW Environment Protection Authority website.

**Name**

Kim Kindler

**Organisation or business name**

Individual

**Position (job title)**

Health liaison

**email address**

[REDACTED]

**Which stakeholder group best describes you?**

General public

**Do you support requiring older operations at EPA licensed industrial premises to meet the more stringent emission standards that apply to newer activities and plant?**

strongly support

**Do you support the transition period (by 2025 to 2030) for these older activities and plant to meet more stringent emission limits?**

strongly oppose

**Comments**

More stringent emissions limits need to be applied effective now. The damage and costs caused by the emitted chemicals have been known about for decades, our laws lag behind other developed countries with which we identify and coal-fired power stations shouldn't even be operational if we had effective

government.

**Do you have any other comments on the remake of the Clean Air Regulation?**

Pollution from coal fired power station is dangerous and harms the health of all living organisms and carries immense health costs to government. It should be mandatory for all air polluters to employ the most strict forms of filters, cleaning and the advanced technologies that exist.

Apparently our Australian air pollution standards are weak compared to many other countries.

Australia has committed us to the Paris agreement on reducing emissions.

Australia must do everything in its power to decrease its emissions and it starts here and now, not in 2030.

**What do you think are the most important sources of air pollution to address in Sydney?**

certain types of old, high powered and heavy vehicles that emit, vehicle numbers on roads, industry,

**What do you think are the most important sources of air pollution to address in Newcastle?**

from local coal-fired power stations- shocking

**What do you think are the most important sources of air pollution to address in Wollongong?**

unsure

**What do you think are the most important sources of air pollution to address in the Greater Metropolitan Region?**

vehicles and industry, bushfires
